

School Building Authority of West Virginia
MULTI-COUNTY/STATEWIDE PROJECT REQUESTS
 For the FY2024 Funding Cycle

Roane-Jackson Technical Center	\$ 5,600,000
<ul style="list-style-type: none"> * Economic development projects in the region of Roane-Jackson Technical Center (RJTC) have created substantial industry demand for a trained workforce in the area, specifically in the mechanical, electrical, and plumbing trades. RJTC currently does not have the capability to offer programs to meet this demand. * This project proposes a new building to the existing campus which will house two new programs: Electrical Technology and HVAC/Plumbing Technology. * Site visited 4/12/23 by Mark Miller, Dana Womack, and Andy Neptune of the SBA with Ben Cummings, Director of RJTC. * Located in Leroy, Jackson County, RJTC serves students from Jackson & Roane Counties. 	
James Rumsey Technical Institute	\$ 1,500,000
<ul style="list-style-type: none"> * James Rumsey Technical Institute's Commercial Driving and Diesel Technology facility's main area is over 47 years old. The roof, HVAC, asphalt, doors, and restroom have had no upgrades in this time. The facility is reaching a critical need for renovations and remodeling to provide a safe and healthy learning environment. * This project proposes to renovate the Commercial Driving and Diesel Technology Facility. This renovation includes a new metal roof, heating units, new air conditioning and air exchange for carbon monoxide protection, exterior lighting on the driving range, new garage doors, and renovations to the existing restrooms. Exterior lighting would allow the program to extend their instruction time further into the evening. This project also includes the repaving the commercial driving range, but if the Authority desires to only fund a portion of the project, the repaving is not a top priority. * Site visited on 4/14/23 by Joyce VanGilder, SBA with Andrew Albright, Assistant Principal. * Located in Hedgesville, Berkeley County, JRTC serves students from Morgan, Berkeley, and Jefferson Counties. 	
Calhoun-Gilmer Technical	\$ 852,227
<ul style="list-style-type: none"> * Calhoun-Gilmer Technical Center is requesting funds for renovations to the Welding Technology classroom, the Culinary classroom, and the kitchen ventilation as well. Both programs are heavily attended and are in need of upgrades to keep up with current industry standards. * This project proposes to renovate two areas in the existing building. The Culinary classroom will be expanded into an adjacent classroom. This additional space will provide more opportunities for the students to simulate the workplace environment and will improve their skills in the program. The renovation in the Welding classroom includes replacing the outdated welding booths and ventilation systems to create a modern and safe environment for the students to increase their welding skills. * Site visited on 4/12/23 by Tommy Young of the SBA, with Bryan Sterns, Director of CGTC. * Located in Grantsville, Calhoun County, CGTC serves students from Calhoun & Gilmer Counties. 	
South Branch Technical Center	\$ 577,995
<ul style="list-style-type: none"> * This project has been re-evaluated resulting in a determination that a second phase is needed in order to properly complete renovations to the designated areas established in the FY 23 Grant. * This project proposes a Phase II renovation to complete the interior work and finishes in order for the current cosmetology classroom in Building C to be reconfigured for the new Middle School program being introduced. * Site visited on 2/2/23 by Joyce VanGiler, SBA with Julie Colaw, Assistant Principal, and Greg Martin with Williamson Shriver Architects. * Located in Petersburg, Grant County, SBTC serves students from Grant, Hardy, and Pendleton Counties. 	
Fred Eberle Technical Center	\$ 503,986
<ul style="list-style-type: none"> * The existing dust collection system within the carpentry shop at Fred Eberle Technical Center is beyond its useful life and does not meet current codes. * This project proposes to replace and upgrade the dust collection system in the carpentry shop. This new system will include a spark-suppression system, a make-up air unit, additional emergency disconnects, and new ductwork equipped with the proper blast gates. * Site visited on 4/25/23 by Mark Miller of the SBA with Mike Murray, Assistant Director of FETC. * Located in Buckhannon, Upshur County, FETC serves students from Barbour, Lewis & Upshur Counties. 	

Facility & Project Details

United Technical Center

\$ 609,728

- * With an aging building and equipment at United Technical Center, components have become outdated and the need for upgrades is apparent. The facility has had two recent thefts of catalytic converters from cars as well as county equipment from storage buildings.
- * This project proposes to address security fencing to prevent future theft, replacement of remaining exterior doors and windows, stormwater drainage at the rear of the facility, replacement of three fire hydrants, and HVAC ventilation issues at the nail salon. Components of this proposal will allow the staff to educate the students in a safer manner within a more modernized facility.
- * Site visited on 4/18/23 by Joyce VanGilder, SBA with Matt Call, Director, UTC and David Snider of Omni Associates.
- * Located in Clarksburg, Harrison County, UTC serves students from Doddridge, Harrison & Taylor Counties.

Total SBA Funds Requested: \$ 9,643,936
