

School Building Authority of West Virginia
CALHOUN COUNTY – CALHOUN COUNTY MS/HS ROOFING, HVAC & SAFE SCHOOL ENTRANCE
RENOVATIONS

A new safe school entry will be constructed to provide a separate, controlled visitor's access directly to the main office.

The existing pump leaks glycol and the maintenance staff catches the glycol into a barrel and refills the system.

The existing equipment has reached the end of its life expectancy and replacement parts are difficult to find.

The roof is the original to this facility constructed in 1998. Overtime, water has entered the classroom spaces during rainy day.
