C.  West Virginia Department of Education – School Access Safety Program

Mr. Stewart notified the Authority that during the 2007 Legislative Session, the West Virginia Legislature enacted into law the School Access Safety Act. This Act provided $10 million per year for five years for School Access Safety improvements statewide. All county school systems were required to perform a school access safety assessment of each of its facilities to determine the immediate needs. The School Building Authority then distributed the allocated funds to each county based on net enrollment. In addition, the Act required that each County provide matching funds of not less than 15%. The final allocation of funding was used for the purposes of critical mapping of all facilities in the State and continued revisions to each County's crisis response plan. The West Virginia Department of Education, Office of School Facilities is charged with ensuring continued revisions to the crisis plans and has contracted with a part-time employee, who assists the counties in these efforts.
The WVDOE, Office of School Facilities provided a written request for the
continuation of these funds, to continue providing support to the counties for these
efforts. This request was provided in Attachment M for the Authority’s consideration.

OLD BUSINESS

A. Policy and Procedure Changes

Mr. Scott Raines advised the Authority that during the December 2017
Special Work Session of the Authority, the staff of the SBA was instructed to make
changes to the SBA Policy removing SBA appointment of Construction Managers,
allowing the County and the Architect to determine the construction oversight method to
be utilized on school construction projects and other general changes to allow more
flexibility on school construction projects. The staff made changes and provided a copy
of those revisions under Attachment N1 – Policy and Procedure Handbook; Attachment
N2 – New Form Index; and Attachment N3 – APPX L Forms.

A brief discussion was held, and the Authority requested the Construction
Committee to meet and review these changes and to report its findings to the Full
Authority at the June 18, 2018 Quarterly Meeting. Upon full approval the staff of the
SBA will file these changes with the Secretary of State’s Office for the Legislative Rule-Making Review Committee to take action on.

B. Clerk of the Works

Mr. Raines informed the Authority that during the December 2017 Work Session, the Authority discussed the SBA compiling a list of qualified Clerks-of-the-Works from which counties could select a Clerk-of-the-Works for their specific construction project. During those discussions the Staff of the SBA advised the members that in order to determine the qualifications of a Clerk, the Authority must first consider the desired duties and responsibilities. Several members of the Authority members recommended duties and responsibilities that provided the Clerk more authority on the job site, while others recommended duties similar to the industry standard. The staff researched industry standard duties of the clerk and found those to be wide ranging. As such the Staff prepared a written report, which was provided in Attachment O.

The Authority requested that the Construction Committee review the attached report and provide additional direction to the Staff. Upon a final decision of duties and responsibilities, the Construction Committee shall report its findings to the Full Authority at the June 18, 2018 Quarterly Meeting. Upon full approval by the Authority the Staff will prepare a list of duties and responsibilities for Clerk-of-the-Works regarding the scope of each individual project.

C. SBA Architectural Fee Structure

Mr. Raines advised the Authority that during the December 2017 Work Session discussions were held regarding design fees paid on SBA projects. During those discussions several members of the Authority expressed concerns regarding the SBA’s current fee structure which allows for a higher percentage fee on smaller projects. This structure pays a higher percentage to the design professional and takes away from the bricks and mortar of the projects. Authority members asked the staff of the SBA to review this policy and provide additional information to the Authority. The Staff contacted other construction agencies across the State to compare their practices and had prepared a written report, comparing those practices. The report was provided in Attachment P.

The Authority requested that the Construction Committee review the attached report and provide additional direction to the Staff. Upon review of these fees, the Construction Committee shall report its findings to the Full Authority at the June 18, 2018 Quarterly Meeting. Upon full approval by the Authority the Staff will prepare a new Design Fee Schedule.

D. Proto-Typical Design Study

Mr. Raines notified the Authority that during the December 2017 Work Session members of the Authority discussed the possibility of proto-typical school designs. Proto-Typical school designs have been of interest to past Administrations and members of the Legislature. As such, the SBA had previously provided those entities a report outlining the potential for a proto-typical school design program, and potential related cost savings. The report has been provided in Attachment Q.

The Authority requested that the Construction Committee review the attached report and provide additional direction to the Staff. The Authority also recommended that the Staff contact Mr. Manny Arvon, Superintendent of Berkeley
County Schools, which has used Proto-Type schools for Elementary Schools and requests that he be available on April 19, 2018 for the Construction Committee Meeting. The Construction Committee shall report its findings to the Full Authority at the June 18, 2018 Quarterly Meeting.

E. Distribution of FEMA Funds for 2016 Floods

Mr. Raines informed the Authority that after the June 2016 floods, Governor Tomblin charged the SBA with administration of the Federal disaster relief funding in accordance with Section 18-9D-15 of the West Virginia Code. The Federal disaster relief funding also provides for property acquisition relating to the directed relocation of substantially damaged facilities. Traditionally, the SBA has not provided state funding for property acquisition on new school construction projects. As such, a concern was raised as to whether the SBA could provide such funding. Executive Director Blackwell, had requested an official opinion of the Attorney General regarding the concern. The Attorney General’s Office had provided a written opinion to the SBA on February 2, 2018. The opinion was provided in Attachment R.

F. Confirm the Responsibilities of a Public Authority under the West Virginia Job Act

Mr. Raines notified the Authority that the SBA was in receipt of correspondence from the West Virginia Division of Labor, regarding employee reporting requirements of the West Virginia Jobs Act, on State funded construction projects. After the repeal of prevailing wage requirements during the 2015 Legislative Session, many contractors have failed to provide certified payroll documents, thinking those were dissolved with the repeal. However, the West Virginia Jobs Act requires a certain level of employee reporting by contractors, to ensure compliance with hiring requirements of the Act. The Division of Labor has had a difficult time receiving the required documents and thus issued the correspondence to all Public Authorities. This correspondence outlines the requirements of the contractor, subcontractor and the public authority receiving bids. A copy of the letter was provided in Attachment S.
