PLEASANTS COUNTY –REFRIDGERATION EXPANSION AT 2 SCHOOLS & PCMS LIGHTING RENOVATION

At Pleasants County Middle School, some areas of lighting are a 4'x4', which is a non-standard type and difficult to replace.

At the middle school, staff must pass through the cooler to get to the freezer. There is a storage room available for expansion nearby.

At the middle school, there are light switches in corridors that control the lighting in several classrooms.

At St Marys Elementary the cooler and freezer are very shallow, and staff struggle to store enough food for the week.
