

RANDOLPH COUNTY – JENNINGS RANDOOLPH ES, MIDLAND ES & NORTH ES LIGHTING SYSTEM UPGRADES

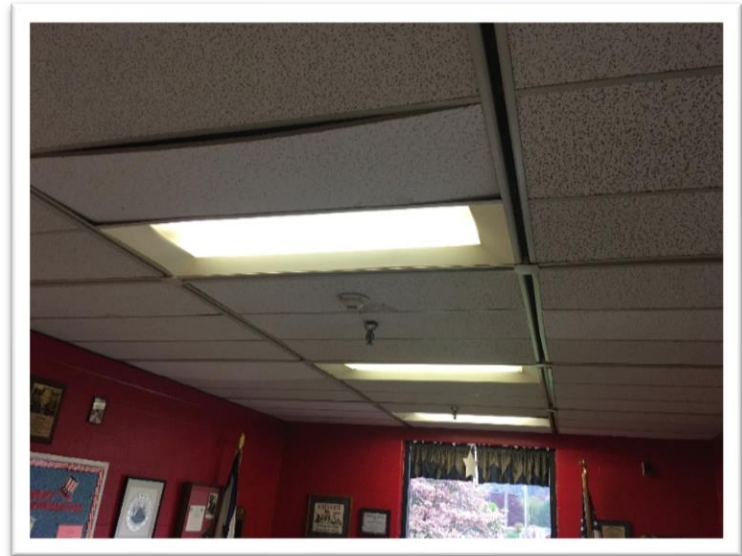

The existing lighting is original to these facilities that were constructed in the mid 1970's.

The lighting in multipurpose spaces are unprotected and creates safety concerns during physical education activities.

The existing lighting fixtures are unique sizes and maintenance staff has trouble finding replacement bulbs.

New LED lighting will provide a better learning environment and offer energy savings at these three facilities.
