

School Building Authority of West Virginia
BROOKE COUNTY - BROOKE COUNTY HS - INTERIOR PLUMBING RENOVATIONS

Brooke County High School was built in 1967, original piping is deteriorating and creating major issues at the facility.

The facility is very well maintained and has four major restrooms for the student body.

The plumbing is located in a crawl space under the facility with some existing pipes underground and hard to find.

Existing pipes are over ½ way clogged, which obstructs camera from videoing the entire piping system.
