

School Building Authority of West Virginia  
JACKSON COUNTY – EVANS ES RENOVATIONS AND KITCHEN ADDITION

The kitchen is small and cramped, with food preparation and cleaning areas in close proximity, not complying with H&S codes.

Classroom entrance sidelights are a safety concern, as they allow unhindered visibility to the entire room.

Exterior windows are original to the school being built in 1960 and are not energy efficient.

All classrooms have PTAC units which do not meet current WVDE indoor air quality requirements.
