

School Building Authority of West Virginia
NICHOLAS COUNTY- HVAC REPLACEMENT AT PANTHER CREEK ELEMENTARY SCHOOL

The rooftop units (RTUs) at Panther Creek Elementary School have begun to show signs of aging and deterioration.

This RTU had recently been serviced, with a defective part set aside for troubleshooting / replacement.

All of the RTUs were replaced over 10 years ago, but the equipment is reaching the end of its useful life.

The coolant that these units require has become outdated, and the HVAC building controls have become obsolete.
