

School Building Authority of West Virginia
PUTNAM COUNTY – NEW HURRICANE MS

The existing, 74 year old school is outdated, undersized, and poses a health risk due to deterioration.

The sewage lines (original terra cotta) constantly back up, with odors infiltrating the school.

When going from one end of the school to the other, students must exit the school twice, posing a safety risk.

The new, 25-acre site, situated adjacent to Hurricane High School, will provide ample room for a state-of-the-art facility.
